INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference T 44512WO/70/hs	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/DE2003/003905	International filing date (day/month/year) 26 November 2003 (26.11.2003)	Priority date (day/month/year) 09 December 2002 (09.12.2002)
International Patent Classification (IPC) or national classification and IPC B29C 49/00, 49/48, B29D 23/00		
Applicant UNICOR GMBH RAHN PLASTMASCHINEN		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of 5 sheets, including this cover sheet.
- ☒ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 4 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 11 June 2004 (11.06.2004)	Date of completion of this report 29 August 2005 (29.08.2005)
Name and mailing address of the IPEA/EP	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/DE2003/003905

I. Basis of the report

1. With regard to the elements of the international application:*

- ☐ the international application as originally filed
- ☒ the description:
 pages _____ 3-6 _____, as originally filed
 pages _____, filed with the demand
 pages _____ 1, 2, 2a _____, filed with the letter of _____ 21 August 2004 (21.08.2004)
- ☒ the claims:
 pages _____ 2-4 _____, as originally filed
 pages _____, as amended (together with any statement under Article 19
 pages _____ 1 _____, filed with the demand
 pages _____, filed with the letter of _____ 21 August 2004 (21.08.2004)
- ☒ the drawings:
 pages _____ 1/4-4/4 _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____
- ☐ the sequence listing part of the description:
 pages _____, as originally filed
 pages _____, filed with the demand
 pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/DE 03/03905

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1 - 4	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 4	YES
	Claims		NO
Industrial applicability (IA)	Claims	1 - 4	YES
	Claims		NO

2. Citations and explanations

1. Reference is made to the following document:

D1: US-A-4492551.

2. The following observations are made with reference to PCT Article 33.

2.1 Document D1, which is considered the prior art closest to claim 1, discloses (the references between parentheses relate to document D1) a mould half shell for a device (figure 1) for producing pipes having transverse grooves, wherein the half shell (2) comprising end faces (see the view in figure 2) which are oriented alongside a moulding section (9) in the direction of feed (4) and are disposed parallel and close to each other, contact each other closely and with a positive fit; a base area (30); and on its inside a cooling channel (33) with a coolant inlet (34) and a coolant outlet (36) for a coolant, wherein the inlet and outlet discharge into the base area (30) of the half shell (2) at a distance from each other. The subject matter of claim 1 differs from the above in that the coolant inlet and the coolant outlet, as seen when

looking at the end faces of the half shells (2), intersect and are oriented in opposite directions to the direction of feed of the half shells (2) so as to ensure that the coolant is delivered to the cooling channel.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem to be solved by claim 1 is to increase the water flow rate through the cooling channel (see page 2, paragraph 3).

The available prior art offers nothing to suggest the features of the solution as proposed in the characterizing part of claim 1. The features of the solution are also not disclosed in the search report citations. Consequently, the subject matter of claim 1 involves an inventive step (PCT Article 33(3)).

2.2 Claims 3-4 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.

3. Claims 1-4 meet the requirement for industrial applicability (PCT Article 33(4)).
